HEALTH (ENV)

College of Health Sciences

Courses

ENV 524. Industrial Hygiene. 3 Credits.
A study of the recognition, evaluation, and control of health hazards in the work environment.
Pre / Co requisites: ENV 524 requires prerequisite of ENV 530.
Consent: Permission of the Department required to add.
Typically offered in Fall.

ENV 530. General Environmental Health. 3 Credits.
This course will address the protection of human health from environmental disease agents.
Students will learn current issues in environmental risk assessment, air and water pollution,
waste management, and workplace health and safety. Students will use this information to
communicate effectively the relevant environmental risk to populations they serve. Training
and education strategies and the use of instructional resources, including the Internet, will be
integrated into the learning experience.
Distance education offering may be available.
Typically offered in Fall.

ENV 532. Hospital Environment. 3 Credits.
A comprehensive assessment of the environmental health aspects of hospitals, including
micro-biologic considerations, environmental hygiene, safety, general sanitation, and
administration.

ENV 533. Water Quality and Health. 3 Credits.
An examination of the physical, chemical, and biological characteristics of natural waters and
their significance for human health; methods of water treatment and distribution also will be
considered.
Typically offered in Summer.

ENV 538. Ground Water Contamination. 3 Credits.
Provides a qualitative and quantitative examination of the fate, transport, and remediation of
contaminants in ground water.

ENV 545. Risk Assessment. 3 Credits.
Provides a qualitative and quantitative examination of hazard, toxicity, and exposure
assessment to establish human health and ecological risk from environmental contamination.
Typically offered in Spring.

ENV 547. Environmental Regulations. 3 Credits.
Provides a fundamental overview of major environmental law principles. Focuses on a wide
range of air, waste, water, transportation, and occupational regulations.
Typically offered in Fall.

ENV 551. Environmental Toxicology. 3 Credits.
A multifaceted investigation of the health problems caused by various toxins and hazards
found in the general environment and the workplace. The human body's reactions to
environmental toxins; how suspected environmental toxins are experimentally investigated
and the specific health effects of critical environmental toxins will be emphasized.
Pre / Co requisites: ENV 551 requires prerequisite of ENV 530.
Typically offered in Spring.

ENV 553. Occupational Safety. 3 Credits.
A study of the practices to reduce safety risks in the work environment through recognition,
evaluation, and control of safety hazards.
Pre / Co requisites: ENV 553 requires a prerequisite of ENV 530.
Consent: Permission of the Department required to add.
Typically offered in Spring.

ENV 570. Emergency Preparedness. 3 Credits.
This course examines the historical, legal, and regulatory framework for dealing with
emergencies emphasizing the four phases of emergency management. It addresses
emergency preparedness by schools, businesses, communities, and counties for natural
disasters, failures of technology (spills, accidents, and explosions), and acts of war or terrorism.
The course is designed for professionals in environmental and public health, emergency
responders (police, fire, hazmat, and medical), planners, educators, and others who may serve
in a leadership capacity.
Typically offered in Summer.

ENV 581. Special Topics: ENV. 1-3 Credits.
An in-depth study of selected, current topics relevant to the development of environmental
health professionals. Specific topics will be noted in the master schedule.
Pre / Co requisites: ENV 581 requires prerequisite of ENV 530.
Consent: Permission of the Department required to add.
Typically offered in Fall, Spring & Summer.
Repeatable for Credit.
