HUMANITIES REQUIREMENT

The central concern of Humanities Distributive courses is to engage students with readings and ideas emerging from philosophical reflection, historical study, and/or literary analysis in the humanities, a tradition whose mission is to describe, analyze, imagine, and explore what it means to be human. Students will be challenged to pursue that mission via argument, interpretation, and discussion and to consider how language, thought, and creative expression speak to an individual’s values, beliefs, and traditions. Humanities courses explicate the underlying assumptions, materials, methods of study, practices, theories, and discussions in appropriate disciplines and subdisciplines in the humanities.

Students must earn 6 credits of Humanities Distributive coursework selected from two different subject areas outside of their major department. This requirement can be fulfilled via transfer credits.

HIS 214. Do No Harm? The Pursuit of Justice in the History of Medicine. 3 Credits.
This course examines the history of how people have understood and experienced health and sickness, and how people have practiced medicine and had medicine practiced upon them, from ancient times to the present. It places particular emphasis on the historical relationship between expert and lay medical knowledge, and in understanding how cultural values have informed the diverse ways that different societies have practiced medicine. The course similarly explores how medical knowledge and practice have become a potent form of cultural authority open to both great accomplishments and great abuse. In particular, we will examine how women, persons of African ancestry, persons with disability, and other historically marginalized groups interact with medical knowledge and practice. Using the analytical tools of social constructivist theory, the course examines how medical knowledge and the practice of medicine can be agents used to maintain structural inequalities. Crucially, however, marginalized persons and their allies also have used their own medical knowledge and practice to challenge these inequalities.
Gen Ed Attribute: Diversity Requirement, Humanities Distributive Requirement.
Distance education offering may be available.
Typically offered in Fall & Spring.

HIS 215. Introduction to the History of Science. 3 Credits.
This course examines the history of science from ancient Greek theories of nature, through the Scientific Revolution, Darwinian Revolution, and the Atomic Age to the Human Genome Project. In particular it looks at the historical changes in what is considered part of "nature" and its "scientific" study, changes in who and what is recognized as legitimate sources of knowledge about nature, and the significance of social factors, especially race, class, gender, and religious and political beliefs, upon the construction and reception of scientific ideas. The course emphasizes how historical methods can be used to better make sense of how and why people and societies construct scientific knowledge, and how and why they integrate that knowledge into culture, religion, politics, art, and other human endeavors.

LIN 130. The World’s Languages. 3 Credits.
Language diversity is a central part of the human experience. How many languages are there in the world, where are they spoken, and where do they come from? Why are some languages very similar, while others are very different? Why have some languages disappeared, while other languages are thriving? This course presents a general survey of language diversity in the world from the perspectives of language structure, language use, and language history. The core of the semester consists of a panoramic view of the world’s main language families and the main languages in each of them. Other topics covered include: the origin of language among humans; language fragmentation and the birth of languages; language families; language contact; language endangerment and death; the main writing systems; and the meaning of bilingualism and multilingualism.

Distance education offering may be available.
Typically offered in Fall & Spring.

LIN 140. Language, Power, and Ideology. 3 Credits.
This course investigates the relationship between language and power as it is manifested in a variety of contexts. It examines the discourse of politics, the language of advertising and journalism, and the discourse of institutions and organizations to uncover ideological biases towards socioeconomic class, sexuality and gender, and race, ethnicity, and age. It also examines how these marginalized groups resist oppression and use language as an agent to speak against and subvert exclusion and discrimination in the United States and globally. Students will look at marginalized groups, including women, immigrants, people of color, LGBTQ individuals, speakers of low prestige dialects, such as Pittsburghese and African American English, and low prestige languages, such as creoles and pidgins, and they will examine how these groups use language to resist and subvert dominant ideologies. The course aims to introduce students to the basic principles of critical discourse analysis, critical stylistics, and sociolinguistics, enabling them to conduct their investigations of issues related to language and power as well as foster an informed and reasoned openness to, and understanding of, difference.

LNC 110. Global Human Rights in Cultural Production. 3 Credits.
This course will introduce students to the concept of Human Rights, familiarize students with the Universal Declaration of Human Rights, and examine case studies of Human Rights problems from around the world. In the first half of this course, students will learn about the development of the concept of human rights through an examination of its theoretical foundations, considering the tension between universality and relativity posed by the concept of universal human rights, and problematizing what this “universality” means for societies that perhaps have other, more pressing needs/priorities not included in the Universal Declaration of Human Rights. In the second half of this course, students will focus on examining a variety of human rights cases as represented in multiple cultural mediums (including films, a poem, a novel, a diary, and documentaries) and practice analyzing these cases to pinpoint the various stakeholders and their interests in the issue at hand. In class, students will learn practical skills and the case study method, which will be brought into class discussions throughout the second half of the course as they consider each human rights case study. Lastly, students will practice imagining themselves within these situations and think critically about the different choices of action they would have as an actor in the issue at hand. Students will practice ethical reasoning in examining how best to act as they imagine themselves navigating the complex field of these human rights questions.
